✓ Please cancel all claims (claims 31-41) of record and substitute new claims 42-52 as follows:

RECEIVED

AUG 20 2001

3600 MAIL ROOM

42. (New) A storage device support member, comprising:

- a. at least one rigid elongated body ^{portion} comprising
- i. a shaped ^{free} end of the elongated body portion, capable of supporting a load,
 - ii. a retention device attachment end of the elongated body portion,
- b. a retention device rigidly attached, to the attachment end of the elongated body portion, the retention device comprising
- i. a cargo control track insert, the insert having upper and lower notches which define at least one adjacent resilient finger which extends beyond the opposing edges of a receiving member receptacle
 - ii. a positive engagement latch, movably mounted on the retention device, the positive engagement latch being movable between a notch blocking position and a release position, and
 - iii. a positive engagement latch operating means, mounted on the retention device, capable of selectively enabling moving said positive engagement latch between the notch blocking position and the release position.

43. (New) The storage device of Claim ~~42~~, wherein the elongated body portion is a two pronged hook shape capable of supporting a load.

44. (New) The storage device of Claim ~~42~~, where the elongated body portion is in a horizontal orientation, capable of supporting a cantilevered load.

20

45. (New) The storage device of Claim ~~42~~ where the elongated body portion is a one pronged singular hook shape.

46. (New) The storage device of Claim ~~42~~ where the elongated body portion is a linear shape capable of supporting a shelf bracket.

47. (New) The storage device of Claim ~~42~~ where the retention device is attached to an overhead cargo control track and the elongated body portion is in a vertical orientation, capable of exerting a tension load.

48. (New) The storage device of Claim ~~42~~ where the elongated body portion is in a shape capable of engaging and supporting a rim mounted tire.

49. (New) The storage device of Claim ~~42~~ where the elongated body portion is a stationary rigid loop.

50. (New) The storage device of Claim ~~42~~ where the elongated body portion is a ring.

51. (New) The storage device of Claim ~~42~~ where the elongated body portion is a straight rod.

51. (New) The storage device of Claim ~~42~~, further comprising stabilizing tabs that extend perpendicularly to the control track insert, capable of limiting pivotal movement relative to the cargo control track.

52. (New) A metal box tube member comprising a rectangular receiving member receptacle, capable of stably and reversibly attaching to the retention device of claim ~~42~~.

REMARKS

Entry of the foregoing and further and favorable reconsideration of the subject application in light of the foregoing amendment and the following remarks, pursuant to and consistent with 37 C.F.R. §1. 112 are respectfully requested.

Applicant respectfully submits that no new matter has been added.
